使用文档

1.1.1. 使用方法

```
<script type="text/javascript" src="js/jquery.min.js"></script>
<script type="text/javascript" src="js/jquery.easing.min.js"></script>
```

1.1.2. 效果演示

http://www.uedsc.com/wp-content/uploads/2015/05/easing-demo/

这个插件弥补了jquery里面的动画效果的不足,使动画效果更加强悍。

支持toggle()、slideUp()、slideDown()、show()、hide()等jQuery内置的动画效果,使用代码如下:

```
$(element).slideUp({
   duration: 1000,
   easing: method,
   complete: callback
});
```

参数duration: 定义动画运动时间,毫秒,其实就是速度,时间越短,运动速度越快。

参数easing: 指定动画效果,Easing js提供多种动画效果,有匀速运动、变加速运动、缓冲波动效果。

参数complete: 动画结束后回调函数callback,可以自定义动画结束后的调用函数

1.1.3. 常用参数(easing)

- ① linear
- 2 swing
- 3 jswing
- 4 easeInQuad
- ⑤ easeOutQuad
- 6 easeInOutQuad
- 7 easeInCubic
- easeOutCubic
- easeInOutCubic
- 10 easeInQuart
- 11 easeOutQuart
- 12 easeInOutQuart
- 13 easeInQuint
- 14 easeOutQuint
- 15 easeInOutQuint
- 16 easeInSine
- 17 easeOutSine

- 18 easeInOutSine
- 19 easeInExpo
- 20 easeOutExpo
- 21 easeInOutExpo
- 22 easeInCirc
- 23 easeOutCirc
- 24 easeInOutCirc
- 25 easeInElastic
- 26 easeOutElastic
- 27 easeInOutElastic
- 28 easeInBack
- 29 easeOutBack
- 30 easeInOutBack
- 31 easeInBounce
- 32 easeOutBounce
- 33 easeInOutBounce

1.1.4. 方法介绍

- 1) def: 默认方式设置
- 2) swing: 默认方式加载
- 3) Quad: 二次方缓动(t)
- 4) Cubic: 三次方缓动
- 5) Quart: 四次方缓动
- 6) Quint: 五次方缓动
- 7) Sine: 正弦曲线缓动
- 8) Expo: 指数曲线缓动
- 9) Circ: 圆形曲线的缓动
- 10) Elastic: 指数衰减的正弦曲线缓动
- 11) Back: 超过范围的三次方缓动
- 12) Bounce: 指数衰减的反弹缓动

关于In、Out、Inout的说明:

- ✓ easeln: 加速度缓动;
- ✓ easeOut: 减速度缓动;
- ✓ easelnOut: 先加速度至50%,再减速度完成动画。

参数如何应用:

 $1. \quad slide Up | slide Down | slide Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Out | fade Toggle | fade In | fade Toggle | fade Toggle | fade In | fade Toggle | fade Togg$

\$(element).slideUp(duration,easing,[callback]);

2、fadeTo

```
$(element).fadeTo(duration,opacity,easing,[callback]);
3, animate
$(element).animate({properties},duration,easing,callback);
例如:
$(element).animate({
  height:500,
  width:600
  },{
  easing: 'easeInOutQuad',
  duration: 500,
  complete: function(){}
});
4、jQuery1.4+版本更可以:
$(element).animate(
    {
    left:[100,'swing'],
    top:[100,'easeOutBounce']
    }
);
或者
jQuery(myElement).animate(
    { left:100,top:100 },
    { specialEasing:{left: 'swing',top:'easeOutBounce'} }
);
```
